GREEN POLICY OF THE INSTITUTION

Samskruti College of Pharmacy endeavors to implement a human environmental co-existence model promoting the welfare of the society through environmental protection. The Policy encourages National and International benchmark for a social and environmentally sustainable campus and set an action plan for environmental culture, management and conservation. The Environmental Policy of the institution covers the following points.

The Institute should abide by the Policy and follow the regulations in the matters of its future developments, infrastructure, constructions and actions plans. The institute shall integrate environmental concerns into every day practice.

The institute should practice the conservation and utilize the natural resources as per environmental laws, regulations and standards for protecting the environment. The institute should foster a culture to support and promote the principles and values of social and environmental sustainability.

The institute should make a commitment to reduce consumption and wastage of energy and explore renewable energy sources as far as possible. In order to do this, the institution should establish and maintain strategic partnership with any one or more of the following viz. students, staff, local governing bodies, private companies, NGOs etc. to develop and promote environmentally sustainable practices through MOUs wherever required.

The institute should establish a sustainable environment management committee (SEMC). The committee should be empowered to make decisions and execute them regarding the sustainable environment set by the state government by promoting greenery in order to reduce harmful effects on the environment, human health and safety.

The institution should explore the possibilities of adopting eco-friendly culture and green buildings. The built environment of the institution should reflect institution's commitment towards ecology as far as possible.

Some of the key areas that the Institution should concentrate adherence to the Green Policy guidelines as are given below:

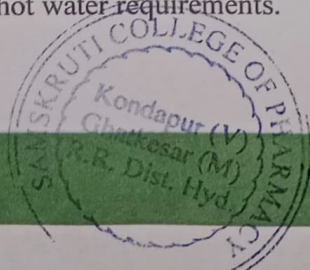

The institute should try and meet its energy needs by using local and renewable energy sources to the extent possible.

Reduce electricity consumption by the usage of the LED lamps and /or solar lamps. Awareness should be given to the staff and students regarding the energy wastage.

The large roof top area of the institute can be installed with solar energy panels. Solar heating technology can be introduced for hot water requirements.

Regd. No. 5782/2000 (Approved by AICTE, PCI, New Delhi and Affiliated to JNTU, Hyderabad)

Kondapur Village, Ghatkesar Mandal, Medchal District (Old R.R. Dist)-501301.

Cell : 9701368996,

The institution should promote plantation both inside and outside the campus and conduct plantation programs.

The institution should make necessary efforts to safeguard and perform maintenance of the trees and plants growing in and out of the campus and

The institution should initiate and continue the medicinal garden apart from the regular gardening activities.

The institution should undertake and promote the construction of water harvesting pits, waste water percolation pits inside the campus for the enhancement of the ground water levels in and surrounding the campus.

The institution should create awareness in the campus community about the importance of usage of water cautiously and undertake construction of tanks for storage and preservation of water which can be used for gardening and growing of plants and trees apart from the usage for regular needs.

The institution should restrict the entry of Automobiles and Heavy vehicles into the campus and provide the necessary facilities for their parking.

The institution should promote fuel saving practices like the usage of bicycles and electrical vehicles for transportation within and outside the campus.

The institution should discourage and/or restrict or ban the usage of plastic covers and other plastic items in and outside the campus and should create an awareness in the campus community regarding the bad effects of plastic usage on the ecosystems and environment as a whole.

The institution should discourage the usage of paper and promote the conduct of most of its activities without using paper or plastic and should discover and implement all the possible ways of avoiding the usage of paper and plastic.

Waste management:

Building up a system- The institute should segregate and manage the waste. Constant efforts should be made for building up a fully functional system for waste management which should rest on the principle of reduce, re-use and replenish.

Green Auditing: Green audits should be conducted by a third party on regular basis to ascertain the adherence to the policy.
