Date of Activity: 18.02.2022

Venue: College Seminar hall

Organized by: Department of Pharmacy

Number of participants: 40

The teenage years are also called adolescence. During this time, teens will see the greatest amount of growth in height and weight. Adolescence is a time for growth spurts and puberty changes. A teenager may grow several inches in several months followed by a period of very slow growth. Adolescence is a crucial time to set young women on a path toward a healthy future. Girls who are poor, have little education or live in rural areas are more likely than their peers to become pregnant, putting their and their newborn's lives at risk. Poor diet and low physical activity are additional challenges which begin in childhood and adolescence, as does sexual abuse. Older adolescent girls are disproportionately affected by intimate partner violence. Pregnancy complications and unsafe abortions are the leading causes of death among 15-19-year-old girls. Therefore it is essential to make the female students and staff members of the college aware about various aspects of adolescent health.

In this program the participants were made aware about

- What is adolescent women?
- What age is an adolescent female?
- The stages of adolescence.
- The physical changes in adolescence.
- How do you take care of an adolescent girl?
- The meaning of adolescent health.
- Why is adolescent girls health important?
- The health needs of adolescents.
- Adolescent health problems.
- The factors that influence adolescent health.

International Women's day in 2022:

International Women's Day is celebrated in many countries around the world. It is a day when women are recognized for their achievements without regard to divisions, whether national, ethnic, linguistic, cultural, economic or political. A woman named Clara Zetkin (Leader of the 'Women's Office' for the Social Democratic Party in Germany) tabled the idea of an International Women's Day. She proposed that every year in every country there should be a celebration on the same day - a Women's Day - to press for their demands. The UN theme for this year's International Women's Day is "Gender equality today for a sustainable tomorrow, recognizing the contribution of women and girls around the world, who are leading the charge on climate change adaptation, mitigation, and response, to build a more sustainable future for all."

Samskruti College of Pharmacy celebrated the International Women's day on 8th March 2022 where in the female students and the staff members gathered in the Auditorium. Some of the participants shared the experiences of their achievements with the others. The female HODs of the college were addressed on the theme of this year's Women's day and its significance to all other participants. The HODs also given the motivational speeches to the participants which are very useful especially to the girl students and the young female staff members of the college for their future growth. This celebration has also provided a platform to discuss and share among the participants the various problems and difficulties being faced by female students and staff members of the college and the relevant changes that they are expecting from the management can be taken to its notice for appropriate solution.

PCOS is a very common hormone problem for women of childbearing age. Women with PCOS may not ovulate, have high levels of androgens, and have many small cysts on the ovaries. PCOS can cause missed or irregular menstrual periods, excess hair growth, acne, infertility, and weight gain.

Therefore it is essential to make the female students and staff members of the college aware about various aspects of PCOS.

In this program the participants were made aware about

- What is PCOS?
- the stages of PCOS.
- The causes PCOS.
- How do you know if you have PCOS?
- The symptoms of PCOS in females.
- What does PCOS belly look like?
- How do I check PCOS at home?
- Can PCOS get pregnant?
- Ways to overcome the problem of PCOS.

World Vaccine Day is a global healthcare awareness event observed on the 10th of November every year, intended to create awareness of the significance of immunisation by getting timely vaccination and how it can be prevented from different diseases. The World Health Organisation (WHO), in association with various international and local groups, joined hands together in this worldwide event to conduct various events, workshops, seminars to create awareness of immunisation.

Therefore it is essential to make the students and staff members of the college aware about World Vaccine Day and its importance.

In this program the participants were made aware about

- Vaccination and its importance.
- Programs undertaken by the WHO for increasing the vaccination awareness and rate.
- Brief note on the vaccination programs undertaken by the Governments in our country.
- World Vaccine Day and its importance.

PROGRAM REPORT

Date: 19.07.2022

Program Name: Haritha Haram

Date: 18.07.2022

Venue: College premises and Campus Surroundings.

Organized by: College NSS unit.

Students participated: 35 members.

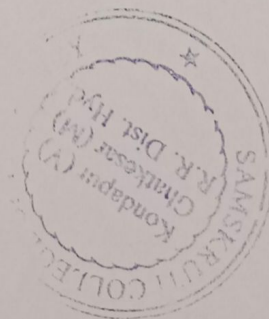

Haritha Haram - An Environmental Promotional Program:

Samskruti College of Pharmacy is conducting an important environmental promotional program named 'Haritha Haram' both inside and outside the college campus every year by making the involvement of more number of female students and staff of the college apart from the male students and staff especially to sensitize them on the importance of the plantation program 'Haritha Haram'. This program also emphasizes the importance and role of plants and trees in minimizing the pollution and in maintaining the good environment for the health and wellbeing of the society. The college is ready to encourage the larger involvement of female students and faculty in any other kind of environmental promotional program that it undertakes in future.

The NSS unit and students of Samskruti College of Pharmacy in association with their faculty have organized a plantation program named 'Haritha Haram' at the college premises and outside the campus of Samskruti Group of Institutions which comes under the village Kondapur on 18th July 2022. The purpose of undertaking this program is to bring an awareness regarding the necessity and advantages of plantation and growing the plants on the earth both in the campus students and in the nearby local community.

PROGRAM REPORT

Program Name: 'Awareness program on Malnutrition'

Date of Activity: 16.09.2022

Venue: College Seminar hall

Organized by: Department of Pharmacy

Number of participants: 44

Malnutrition refers to deficiencies or excesses in nutrient intake, imbalance of essential nutrients or impaired nutrient utilization. The double burden of malnutrition consists of both under nutrition and overweight and obesity, as well as diet-related non-communicable diseases. Malnutrition is a serious condition that happens when your diet does not contain the right amount of nutrients. It means "poor nutrition" and can refer to: under nutrition – not getting enough nutrients. over nutrition – getting more nutrients than needed. Malnutrition leads to various diseases in future if not treated properly. It is essential to avoid the malnutrition. Therefore it is essential to make the students and staff members of the college aware about various aspects of Malnutrition.

In this program the participants were made aware about

- The malnutrition and its types.
- Persons who are at most risk of malnutrition.
- The different stages of malnutrition.
- The symptoms of malnutrition.
- The different causes of malnutrition.
- The different diseases of malnutrition.
- The formula for malnutrition.
- How is malnutrition treated in general?
- Prevention of malnutrition.
- The effects of malnutrition.
- The disadvantages of malnutrition.
- What are common malnutrition?
- What is the most common malnutrition?
- The ten steps in management of malnutrition.
