Kondapur Village, Ghatkesar Mandal, Medchal District (Old R.R. Dist) - 501 301.  
Cell : 9701368996,

Program Name: A certificate programme on pharmacovigilance

Duration : 30 hrs

A.Y:2022 to 2023

## OBJECTIVES

The vision of pharmacovigilance is to improve patient safety and welfare in Indian population by monitoring drug safety and thereby reducing the risk associated with use of medicines. The ultimate safety decision on medicines may need consideration of comparative benefit/risk evaluation between products for similar indications .

## LEARNING OUTCOMES

- Discuss the roles and related mechanisms in terms of pharmacokinetic factors.
- Define the importance of pharmacovigilance
- Express impact of the dose.
- It acquires knowledge that the purpose of the pharmacovigilance activities is to preserve human health.
- Discuss the relationship between adverse drug reactions and mechanism of actions of drugs.
- Define the properties of receptors on drug action.
- Define the post receptor mechanisms.
- Summarize the roles and properties of cytochrome enzymes on adverse drug reactions.
- Describe where the adverse reaction Notification form will be delivered .
- Discuss the important adverse drug reactions on the pharmacokinetic and pharmacodynamic mechanisms
- Define the important adverse drug reactions on the system like nervous, immune, cardiovascular and digestive system.
- Summarize importance of adverse drug reactions on drug actions and use.

## Summary:

Pharmacovigilance refers to the science and activities relating to the detection, assessment, understanding and prevention of adverse effects and other drug-related safety problems.

Related to this general definition, the underlying objectives of pharmacovigilance are to prevent harm from adverse reactions in humans

that arise from the use of health products within or outside the terms of marketing authorization and in relation to the life cycle of these health products to patients, health – care professionals, and the public pharmacovigilance is therefore an activity contributing to the protection of patients and maintaining public health.

Many other issues are also of relevance to pharmacovigilance related activities and include medication errors, lack of efficacy reports, off-label use, acute and chronic poisoning, assessment of drug-related mortality, abuse and misuse of health products, and adverse interactions of medicines with chemicals and other drugs. The pharmacovigilance approach interactions of medicines with chemicals and other drugs. The pharmacovigilance approach can be clinical, epidemiological, experimental (e.g., to reproduce an adverse effect animals to better understand the mechanism involved for human protection) or diagnostic (e.g., imputable method) The ultimate goal of pharmacovigilance is to accurately characterize and optimize the benefit/risk ratio of a health product throughout its life cycle.

SESSION	TITLE	DURATION
1	Introduction to preventive medicine	3 Hrs
2	Infant care	3 Hrs
3	Child and adolescent care	3 Hrs
4	Prenatal care	3 Hrs
5	Adult health maintenance	3Hrs
6	Breast cancer & Ccreening	3 Hrs
7	Diabetes & Hypertension	3 Hrs
8	Colorectal cancer	3-Hrs
9	Prostate cancer	3 Hrs
10	Lung cancer	3Hrs

## DEPARTMENT OF PHARMACY

Academic Year : 2022 – 2023

Class and Semester : M PHARM I YEAR

Title of Add – on/ Certification Program : A CERTIFICATE PROGRAMME ON PHARMACOVIGILANCE

Duration : 30 Hours ( 3 Hrs per day ) during 03 – 01- 2023 To 13 -01 – 2023

Course Code : MPI

### OBJECTIVE EXAM

Answer All Questions. All Questions Carry Equal Mark Time : 30 Min. Marks : 10

1. The science & activities relating to the Detection, Assessment understanding and prevention of adverse effects or nay other drugs related problems is called Pharmacovigilance . This information is:

- a) True       b) False

2. Why Pharmacovigilance is needed for our products?

- a) Protection of patients       b) Minimizing risks and taking appropriate measures  
c) Fulfill regulatory requirement of DGDA and or PV agreement with business patner      d) All of the above

3. 4 Amy one can send an AE report to PV:

- a) Only in office hour  
 b) For 12 hours in a day  
 c) For 24/7  
 d) Open only bfor out of office coverage

4. You can send reports to Department of Pharnmacovigilance by:

- a) Phone call  
 b) SMS  
 c) E-mail  
 d) All of the above

5. Basic criteria for valid AE reports are:

- a) 2       b) 3       c) 4       d) 5
6. When do you consider an event to be serious?
- a) Death       b) Life threatening

7. Drug used for the prevention, diagnosis or treatment of a rare disease or diagnosis of a disease that is life threatening or chronically debilitating is known as:

- a). adverse drug reaction
- b). suspected drug
- c). orphan drug

8. voluntary reporting is also known as

- a). non-spontaneous reporting
- b). adverse drug reporting
- c). adverse event reporting
- d). spontaneous reporting

9. UMC means

- a). Uppasala Monitoring Centre
- b). Union Monitoring Centre
- c). Uni Monitoring Centre
- d). None of the above

10. The first DSUR period should no longer than the

- a). <1 year
- b). >1 year
- c). >2 years
- d). >4 years
