

2.2.1 The institution assesses the learning levels of the students and organizes special Programmes for advanced learners and slow learners

Response:

The institution offers quality education with a structured curriculum and also provides a strong base for the nourishment and overall development of the girl students by strengthening their physical and intellectual abilities.

Most of the students joining the institution into various programs are from rural, semi urban and urban background with varied socio-economic status. Institution has a well framed approach in curriculum implementation to improve their quality. Some of the programs conducted for coping up of diversified students include the following:

Orientation Program:

Orientation Program for both B. Pharmacy and Pharm D is conducted in the first week of their admission. This enables the students know about different courses and the importance of each course in their program. The principal of the institution and the teaching staff of first-year Program are engaged in this Orientation Program.

Bridge Course:

Bridge Course has been designed to fill the basic knowledge gap between students of different disciplines and to make them confident as students from both MPC and BiPC backgrounds join B. Pharmacy and Pharm D programs. MPC students lack knowledge of Biology and BiPC students lack knowledge of Mathematics and the Bridge course serves the purpose of providing necessary insights.

Personality Development Program me:

Some learners have less focus on molding their personalities to the challenging environment because of the differences in maturity levels or their mind set. To address this problem and train the budding learners, after their admission are assessed to identify their skills, and sessions on Personality Development are arranged for about 3-5 days in the beginning of First Semester by expert trainers.

Communication Skills Classes:

The Institution offers English Communication Skills classes for UG students to improve their L-S-R-W skills and to make them good contenders globally.

Assessment of Learning Capabilities:

Diversified students are assessed for their learning levels after their admission into different programs in the following manner:

Principal
Samskruti College of Pharmacy
Kondapur (V), Ghatkesar (M),
Medchal Dist. PIN-501501

Based on the assessment, they are identified as advanced and slow learners. Special programs are planned and executed for them.

Programmes for Advanced Learners:

- They are encouraged to attend classes for qualifying in national and state level PG entrance exams like GPAT and TSPGECET.
- Advanced learners are encouraged to present Posters and Oral Presentations and Power Point presentations at Seminars/ Conferences/ Workshops etc.
- They are encouraged to publish research papers in National and International Journals.
- Advanced learners of Pharm D are encouraged to write articles for the News Letter "*Sanjivini*".

Programmes for Slow Learners:

- Slow learners are supported through mentorship.
- Special tutorials are conducted to revise the difficult topics.
- Special Communication Skills classes are arranged to improve their language skills.
- Remedial classes are conducted to improve knowledge on backlog subjects.
- Question banks are given to focus on important topics.
- Old question papers are discussed to make them comprehend the paper pattern.

Other Programmes.

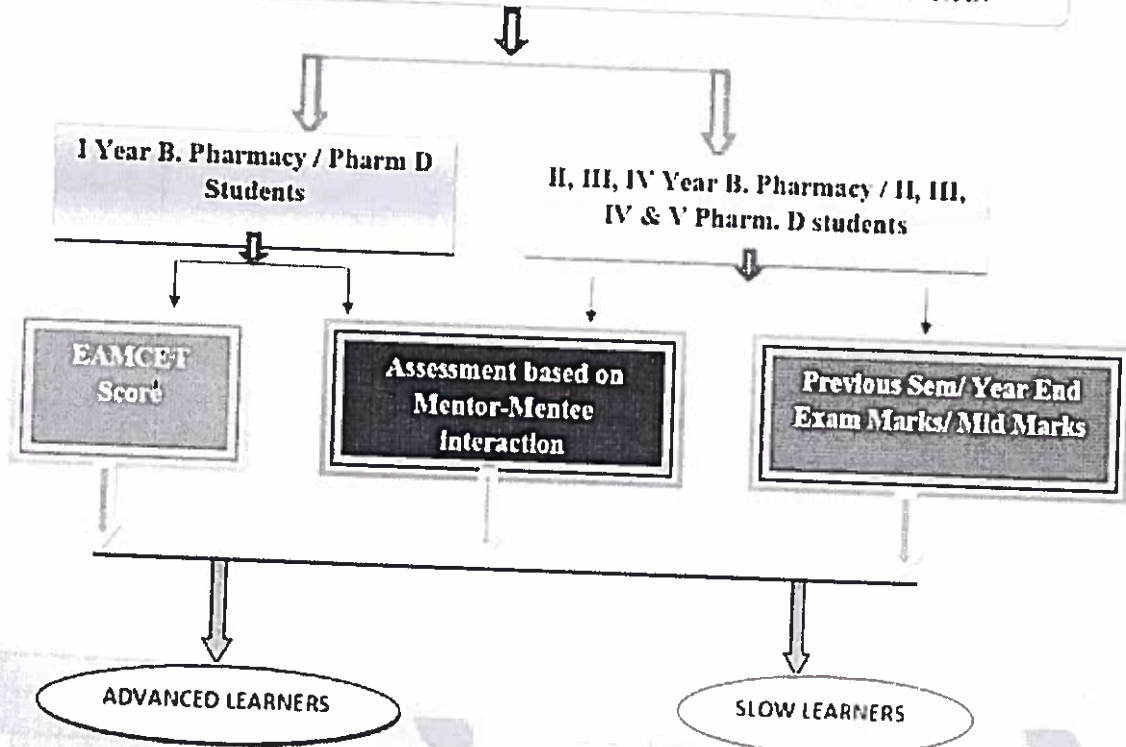

Apart from academics, to improve their cognitive abilities and physical fitness, students are encouraged to take part in Games, Cultural, Yoga, Karate and NSS activities.

NIPER JOINT ENTRANCE EXAMINATION - 2023

CONDUCTED BY NIPER, GUWAHATI

National Institute of
Pharmaceuticals

AHMEDABAD | GUWAHATI | HAJIPUR | HYDERABAD | KOLKATA | RAEBARELI | SAS NAGAR |

NIPER JEE - 2023 RANK CARD

Hall Ticket Number	2309160147
Application Number	11810092350
You Applied for	All master Courses Except Medical devices - iPG-PhD

Candidates's Full Name	EPPA NAGARAJU	
Father's/Guardian's Full Name	EPPA YELLAIAH	
Date of Birth	01/03/2001	
Gender	MALE	
Category Type	SC	
Marks Secured	40/0000	
Rank In Figure	2037	
Rank In Words	Two * Zero * Three * Seven	

This is a computer generated document Hence, does not require signature.

LIST OF PROGRAMMES FOR SLOW LEARNERS

A. Y 2022- 2023

Based on socio economic back grounds and the assessment criteria listed slow learners are given the opportunity

To improve skills through following programs

- Mentor counselling to support and guide the students
- Special tutorials to revise the topic
- Remedial classes to improve knowledge on back log subjects
- Old question papers discussion regarding exam pattern.

PHARMACEUTICAL ANALYSIS PHARM D III YEAR

QUESTION BANKS

1. Discuss the principle & development techniques used in column chromatography Add a note on the adsorbents mobile phase & detection systems in column chromatography.
2. Write a note on development techniques in column chromatography.
3. Describe the preparation, activation of plates & adsorbents used in the TLC & write its application.
4. Define paper chromatography? What are the modes of development of paper chromatography & enumerate the application of paper chromatography.
5. Give a detailed account of principle, classification of Ion-Exchange process in pharmaceutical analysis.
6. What are the Ion-Exchange resins? Explain Mechanism of Ion-Exchange process and application of Ion-Exchange chromatography.
7. Explain with a neat diagram any three detectors used in Gas Chromatography.
8. Describe the construction and working of a Gas Chromatography? Emphasize on the ideal characteristics of stationary phases and mobile phases used in Gas Liquid Chromatography.
9. Describe instrumentation and application of HPLC.
10. Describe the principles and application of Electrophoresis.
11. Explain various methods of preparing TLC plates and its application.
12. How development is carried out in column chromatography, TIC & Paper chromatography.
13. Describe the principle of a Potentiometric titrations? Write the construction and working of a calomel electrode & glass electrode?
14. Give an account of the construction and working of glass electrode? Write the application of potentiometric titrations.
15. Describe the construction and working, advantages, disadvantages & application of a Standard Hydrogen Electrode.
16. Explain the theory & the types, of Conductometric Titrations.
17. Write the base principle of a potentiometry. Describe in detail Dead Stop End point techniques.
18. Describe the construction and working of a Double-Beam Recording Dispersive IR Spectrophotometer with its advantages and disadvantages.
19. Outline the working of a double beam recording of UV/Visible spectrophotometer Name each part of the system and functioning.
20. Describe the construction and working of Double-Beam UV/Visible spectrophotometer.
Mention the advantages of double beam & single beam spectrophotometer.
21. a) Derive Beer's & Lambert's Law's. What are the applications advantages and limitations of Beer's law.
b) State two examples of Beer's law.
22. Describe the principle and Application of IR Spectroscopy for the following A) Detection of functional groups (two example) B) Study of Hydrogen Bonding.
23. Explain the principal instrumentation and factors affecting fluorescence intensity.

insert

5. Write a note on paper electrophoresis
 6. What is electrophoresis? Mention their types.
 7. Describe the principles and application of electrophoresis
 8. Write a note on HPTLC.
 9. Write a note on instrumentation and application of HPTLC.
 10. Define Validation? Classify and explain each type in briefs.
 1. Define & Explain (1) Accuracy (2) Precision (3) Significant figure.
 2. Describe different steps involved in validation master plan.
 3. Explain the procedure to calibrate wavelength of UV Instrument.
 4. Write a note on ICH Guidelines
 5. Describe the pharmaceutical water system Validation.
 6. Define Validation? Explain types of "process Validation"?
 7. What is the principle in potentiometric titration and How is the end point determined in Potentiometric titrations
- Enumerate the different reference electrodes & Indicators electrodes in potentiometric titrations.
1. Explain the principle underlying "Dead-Stop end point technique" and Null point potentiometry.

Explain the term a) HETP b) Retention time c) Theoretical plate d) Retention volume.

Define HPLC & write a note on detectors present in HPLC

Write a note on Guard Column and its significance

What are the techniques of separation in HPLC based on a) Principle of separation b) Elution Techniques c) Types of analysis d) mode of operation.

What is the principle in a) Normal-Phase Chromatography b) Reverse -Phase Chromatography c) Ion- Exchange Chromatography d) Ion-pair Chromatography.

Define chromatography? What are the principles of separations in chromatography.

Describe the preparation activation of plates & adsorbents used in TLC.

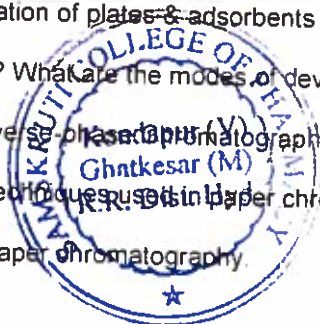

Define paper chromatography? What are the modes of development in paper chromatography

Explain two dimensional & Reverse-phase paper chromatography

Explain various development techniques used in paper chromatography.

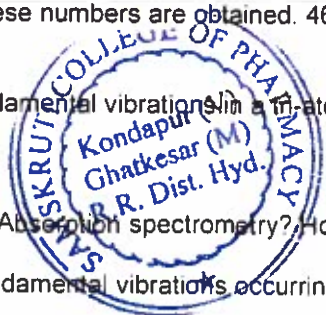

Enumerate the application of paper chromatography.

Medchal Dist. PIN-501101

- 3) Cardiac glycoside
- 4) Aldehydes or ketones
- 5) proteins.
6. How will you perform quantitative analysis in paper chromatography
7. Compare the principle techniques limitations and application of paper chromatography with electrophoresis
8. How does the following factors affect separation
9. write a note on paper electrophoresis.
10. What is electrophoresis? Mention their types.
11. Describe the principles and application of electrophoresis.
12. Write a note on HPTLC.
13. Write a note on instrumentation and application of HPTLC
14. Define Validation? Classify and explain each type in briefs
15. Define & Explain (1) Accuracy (2) Precision (3) Significant figure
16. Describe different steps involved in validation master plan.
17. Explain the procedure to calibrate wavelength of UV Instrument
18. Write a note on ICH Guidelines.
19. Describe the pharmaceutical water system Validation.
20. Define Validation? Explain types of process Validation"
21. What is the principle in potentiometric titration and How is the end point determined in Potentiometric titrations
22. Enumerate the different reference electrodes & Indicators electrodes in potentiometric titrations
23. Explain with graphs the methods of potentiometric end point determination.
24. With titration curves, describe the principles of Conductometric titrations?
25. Explain with graph, the conductometric titration of a mixture of weak & strong acids with alkali.
26. Explain the conductometric titration curve for strong acids against weak base?
27. What is quenching? Explain various types of quenching with suitable examples?
28. What is the number of Fundamental Vibration modes for linear and non-linear molecules containing 'n' atoms? Explain how these numbers are obtained.
29. What is nebulization? Write a note on types of Burner's used in atomic emission spectrometer.
30. Depict the different modes of fundamental vibrations in a tri-atomic group (stretching & ...)
31. What is flame emission & atomic Absorption spectrometry? How do you estimate the amount of sodium chloride above techniques
32. Explain the different modes of fundamental vibrations occurring in IR Spectroscopy

Principal
 Sanskruti College of Pharmacy
 Kondapur (M), Ghatkesar (M)
 Medchal Dist. PIN-501301

12. What are the factors affecting the fluorescence.
13. Write a note on spectrophotometric titration.
14. Explain deformation vibrations in IR Spectroscopy.
15. What are the effect of solvent & conjugation in UV Spectroscopy.
16. Write the structure and chemical name of BMR Reagent. Write the principle involved in the reaction of BMR with Sulphanilamide along with chemical reactions.

Signatures

17. State & explain the mathematical expression for Beer's & Lambert's law.
14. Give any four Important application of UV & Visible absorption spectroscopy.
15. How do you determine the amount of paracetamol in a given tablet according to IP by means of UV using 1cm cell (at 257nm).
16. Write a short note on ORD & give its applications.
17. Describe why UV/Visible spectrometry is widely used for assay of a drug sample than other methods.
8. What are the minimum requirements for a molecule to show I.R bands. State selection rule for exhibiting IR Vibrations.
9. What are the different sampling techniques for mounting a sample in the form of a solid, thin film, liquid or gas in the beam of IR spectrometer.
10. Why carbon-di-oxide shows some IR bands though the molecule as a whole does not possess any dipole moment?
1. Give approximate stretching wave number values for the following groups C-O, C-N, C=C, =N.
2. What is the basic requirement for a nucleus to exhibit NMR phenomenon?
3. What are the main advantages of mass spectrometry.
4. Calculate (a) frequency (b) wave number for the radiation of wavelength 530nm ($c = 3 \times 10^8$ m/s).
5. Calculate the wavelength corresponding to a radiation in which the energy of photon 5×10^{-22} J.
6. Calculate the frequency of a radiation of wavelength 700nm.
7. Give reason why you will get absorption curve rather than peak in Ultraviolet region? 78. What are the factors affecting fluorescence and phosphorescence?
8. What is Quenching? Explain various types of quenching with suitable examples?
9. What are self-quenching and true quenching.
10. Show the relationship between fluorescence intensity and concentration. Describe any four factors that influence fluorescence intensity?
