VISION & MISSION

VISION

“To be a centre of excellence by redefining pharmacy education and nurture globally competent professional pharmacists”

MISSION

To train and develop students into professional pharmacists so as to fulfill the industrial and community needs. To shoulder the responsibility of reducing the suffering of mankind by providing Pharmaceutical care.

PHARMACY

A Pharma degree is a tool to join the field of medicine research and development as a career option. A drug/medicine before being prescribed by a doctor has to undergo tests and approvals. It is tested in a lab, studied for dosage and side effects, only then prescription guidelines are formed. The medicines then undergo clinical trials and only when after studying all the possible effects of the medicine, it is introduced in the market. Pharmacists are a part of the entire process. They are also responsible for introducing a new drug/medicine to various medical practitioners.
