She has worked on a project titled **COVID19 FUTURE FORECASTING USING SUPERVISED MACHINE LEARNING MODULES..** This project was aimed that "an ML-based prediction system has been proposed for predicting the risk of COVID-19 outbreak globally. The system analyses dataset containing the day-wise actual past data and makes predictions for upcoming days using machine learning algorithms. The results of the study prove that ES performs best in the current forecasting domain given the nature and size of the dataset. LR and LASSO also perform well for forecasting to some extent to predict death rate and confirm cases.". During her internship she has demonstrated her skills with self-motivation to learn new skills. She was able to complete the project on time.

We wish her all the best for her upcoming career.
