Abstract

Hydrogels have been available for more than half a century and they have many uses in various practices ranging from industrial to biological. Hydrogels are a polymeric network that can able toabsorb a large quantity of water and swells up to an equilibrium point. The water absorbing capacity of hydrogels depends on hydrophilic functional groups and space availability in the polymeric structure. Here in this work, we prepared hydrogels from an animal based natural polymer-Chitosan. Crosslinkers plays an important role in the properties of hydrogels. Chitosan hydrogels were prepared without crosslinker and by using different concentrations of glutaraldehyde, which is the most commonly used crosslinker. Chitosan hydrogels can hold a large amount of water by swelling. Swelling nature of uncrosslinked and crosslinked hydrogels were studied in aqueous medium at various temperature and in different P^H mediums at different intervals of time.

Keywords: Chitosan, Glutaraldehyde, Swelling properties, Hydrogels.

INTRODUCTION

Hydrogels are hydrophilic polymer materials that are cross-linked, three-dimensional and can retain, swell, and hold large volumes of water or aqueous fluids (1). The associations are comprised of homopolymers or co-polymers and are insoluble due to the presence of chemical cross-links (tie-points, junctions), or physical cross-links, such as embarrassments or crystallites (2). These gels are effective in day-to-day life and used extensively in food, husbandry manufacturing, cosmetic make up foundations, medicine, and medical discourse etc. Currently, Hydrogel get wide orbit of applications because of their lower berth price, nonpoisonous, and environment-sociable nature. Hence, these are used as biomaterials that reveal sensible purpose in several fields of biomedical or therapeutic industry (3).

Chitosan, is a linear polysaccharide collected of β-(1-4)-linked d-glucosamine and N-acetyl-d glucosamine. Chitosan is derived from Chitin, which is extracted from hard skeleton matter of shellfish, lobster, shrimp, and crabs. The structure of Chitosan is shown in figure 1. It has lots of applications in the medical, health, and pharmaceutical industry because of its biocompatible nature. Any form of chitosan (solution, dryflakes, and fine powder) can dissolve in organic acids such as acetic acid, formic acid, tartaric acid, and citric acid of P^H <6. Crosslinked chitosan is frequently used to prepare microspheres of their form, they have been widely used for drug delivery such as antibiotics, anticancer agents, vaccines, etc. (4, 5). The positive amino group of chitosan is very active and readily binds with negatively charged surfaces such as mucosal membranes. The free amino group of chitosan can form crosslinked polymer networks with dicarboxylic acids to build up the material. It forms gels with several multivalent anions. The hydrogels of chitosan, like other hydrogels, contain much

Current work Role & Key Achievements:

1. Conducted Intramural sports for Polytechnic, Engineering & Pharmacy in the year 2023.

2. Kabaddi team participated in JNTUH selection & Athletics JNTUH Selection

3 Our b.tech 3rd year four students have participated in Mixed Netball nationals which is conducted in Bhopal on sep 7th to 9th 2024.

Strengths:

1. I connect well with students, encouraging them to join in sports and supporting those who compete.

2. I co-ordinate sports events smoothly, handling schedules and organising tournaments.

Areas for Improvement:

1. I would like to learn new strategies to engage more students in sports, especially those less interested in physical activity.

2. I want to work on handling multiple tasks more efficiently.

Goals for Next Year:

1. Sending our students for JNTUH selections for Kabaddi, Cricket, Volleyball, badminton and this time Athletics and kho-kho.

2. Aiming to send polytechnic students for district, State, National level competitions for all the games & sports.

Subject: Request for Salary Increment

Respected Sir,

I am writing to request a review of my salary based on my work and contributions over the past year. As the Physical Director, I have taken on additional responsibilities and achieved several key milestones in the areas of sports coordination, infrastructure development, and student participation in events.

Here are some of my key achievements from 2022-2024:

1. **Intramural Sports**: I successfully organized intramural sports events for students in the Polytechnic, Engineering, and Pharmacy departments, which saw increased student participation.
2. **Sports Infrastructure**: I was involved in setting up new sports facilities, including the Volley Ball, Kabaddi,Badminton and Kho-Kho courts, ensuring students have access to proper training resources.
3. **Kabaddi and Athletics**: I managed the Kabaddi team's participation in the JNTUH Selection Athletics for 2024, which gave our students the opportunity to compete at a higher level.
4. **Mixed Netball Nationals**: I coordinated the participation of our Engineering department in the Mixed Netball Nationals held in Bhopal in 2024, with students such as Mandeep, Ajay, Vinay, and Jyotshna making significant contributions.

In addition to my primary responsibilities, I have also supported the department in various ways, including mentoring junior faculty and helping with the development of sports programs.

Considering the increased workload and my contributions to the college's growth in sports and student engagement, I would like to request a salary review to better reflect my efforts and responsibilities.

Thank you for your time and consideration. I look forward to discussing this further with you.

Sincerely,
M SAIDULU

REPORT OF PH.D. STATE-OF-ART-SEMINAR (SOAS)

Name of Student	: Mrs. Dharanikota Rupalakshmi
Enrolment No.	: DS20MA003
Month & Year of Registration in the Ph.D. Programme	: 03/2021
Date of State-of-Art-Seminar (SOAS)	: 22/07/2022
Topic	: Finite Element Analysis on Hydromagnetic Convective Nanofluid Flows : Optimization and Sensitivity Analysis
Name of the supervisor	: Dr. Surender Ontela
Name of Co-Supervisor	: Dr. Thirupathi Thumma

Comments & Observations:

1. Mrs. Dharanikota Rupalakshmi has presented her topic of research, detailed literature review, and proposed PhD thesis work before the members of the Doctoral Committee.
2. The candidate has answered questions pertinent to her research topic raised by the DC members, satisfactorily.
3. The DC accepted her proposed research work and advised her to work diligently to achieve the research objectives of the thesis.
